Summary

I am a Bachelor of Science graduate in Informatics Engineering, STMIK Banisaleh Bekasi. with a strong determination and desire to have a career in the field of Informatics, more precisely as a programmer. During my academic journey, I had the opportunity to intern as a Junior Programmer at an IT Consultant company, gained experience developing websites in one of the well-known state-owned companies. besides that, during college I participated in the Informatics Engineering Student Association Forum. After graduating, I continued to work back at the place where I interned and then developed a website at a state-owned company during the current contract. website in a state-owned company during the current contract. After being in the company, I attended training held by a software development service company, CODE.ID. I participated in Fullstack MERN training My involvement in various organizations has equipped me with skills in programming and problem solving. in terms of programming and problem solving that I face. I am a great person and have high responsibility and uphold honesty, strong in teamwork, curious, eager to try new things, and never give up.
